AML7001 Applied Machine Learning
Module Handbook 2026-27

Welcome

This module introduces the practical side of machine learning: preparing data, choosing models, and above all evaluating them honestly.
Teaching runs over twelve weeks with a lecture and a workshop every week.

Teaching team

Module leader: Dr Imogen Hale. Workshop tutors: Sam Okafor and Priya Natarajan.
Office hours are on Tuesdays, 13:00 to 14:00, in room CS2.14.

Assessment

The module is assessed by one coursework and one written examination.

Coursework 1 (Model Evaluation Report), 40%:
due Friday 13 November 2026 at 23:59.
Written examination, 60%: January 2027 examination period.

Coursework is submitted online through the module page.
Feedback on Coursework 1 is returned within 15 working days.

Late work and extenuating circumstances

Work submitted up to 24 hours late is capped at the pass mark.
Work submitted more than 24 hours late receives a mark of zero.
If illness or other circumstances affect you, submit an extenuating circumstances claim no later than 5 working days after the deadline.

Academic integrity

You may use generative AI tools for brainstorming only. All submitted text, code and figures must be your own work unless clearly attributed.
